

Seafroni

The route would extend along the promenade from the Wish Tower to Fisherman's Green and would link the two existing cycle routes along the Seafront.

The key aspects of the route are:

- Cyclists will be allowed to cycle along sections of the promenade and will share the space with pedestrians (i.e. there would not be a dedicated cycle track reserved for cyclists).
- At the Wish Tower, cyclists and pedestrians will share the middle promenade which is over 6m wide.
- At the Pier, a widened footway area would be provided to increase the space available for both pedestrians and cyclists.

The estimated cost of this route option is £60,000 and would be funded from the LSTF.

NOTE: Before cyclists are allowed to use the promenade the existing Eastbourne Borough Council by-law prohibiting cyclists from using the promenade will need to be revoked. The timetable for this, if required, has yet to be agreed.
